SUMMARY

MERN Stack Developer with hands-on project experience in React, Node.js, and MongoDB. Proficient in Python, NumPy, and Pandas, with a strong focus on breaking into Machine Learning and Generative AI. Passionate about building intelligent, scalable web applications.

SKILL

Languages: C++, JavaScript, Python

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Data Science Libraries: Numpy, Pandas, Matplotlib, Seaborn

Tools & Platforms: GitHub, VS Code, Postman, Vercel, Render, Netlify

Soft Skills: Problem-solving, Communication, Team collaboration

PROJECTS

1. Backend Authentication System | [GitHub](#)

- Implemented full auth flow: user registration, email OTP verification, login, logout, and logout from all devices
- Engineered JWT-based access & refresh token system with 10-minute access tokens and 7-day rotating refresh tokens stored as HttpOnly cookies
- Implemented session management with IP and user-agent tracking; sessions can be individually or bulk-revoked
- Integrated email service for OTP delivery with HTML email templates

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, Nodemailer, Crypto

2. IPL 2025 Batters – Exploratory Data Analysis | [GitHub](#)

- Performed end-to-end EDA on IPL 2025 batting dataset using Python, Pandas, and NumPy
- Extracted team-level insights using GroupBy aggregations — identified top run-scorers, best strike rates, and most consistent batters per team
- Filtered and ranked players using multi-condition queries across 10+ statistical attributes

Tech Stack: Python, Pandas, NumPy, Jupyter Notebook

3. ScanMyMenu – QR-Based Restaurant Ordering SaaS | [Live Demo](#) | [GitHub](#)

- Built a full-stack web app that allows restaurants to generate a QR code for their menu — customers scan it and instantly view the menu without any app download
- Built a restaurant admin panel where owners can add, edit, and delete food items and manage food categories dynamically
- Designed and implemented REST APIs with Node.js and Express for menu and category CRUD operations backed by MongoDB

Tech Stack: React.js, Node.js, Express.js, MongoDB, Vercel, Render

EDUCATION

Bachelor of Computer and Application

- Institute of Technology and Science (CCSU)
- 2024 -2027 (Expected)

Senior Secondary (Class XII), CBSE

- Indraprastha Public School, Ghaziabad - 88%
 - 2023 - 2024
-

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
- **Certifications:** - HTML, CSS & JavaScript for Beginners, Workshop on Game Development using Python
